SCOOPEXLTM

Always with the patient, from the immobilization, during the transport to the emergency room up to the inside of the diagnostic and emergency departments.

CROSSOVER TRIALS —

AVAILABLE COLOURS -

Studies carried out at the Center for Emergency Medicine at the University of Pittsburgh show that the degree of spinal immobilization with SCOOPEXL™ stretcher is equivalent to that obtained with a spinal board.

They also show that a reduced number of manoeuvres by the operator is sufficient, thus causing less stress to the patient's backbone.

YELLOW, RED, GREEN AND GREY

The SCOOPEXL™ stretcher is classified as a SAFETY 4 YOUR BACK device. The SAFETY 4 YOUR BACK devices are specifically designed to protect the healthcare operator's backbone.

USER-FRIENDLY

It allows the operator to carry out all the handling manoeuvres required for the traumatised patient in any environment.

It allows to immobilize a patient on any type of ground through the intervention of only two operators.

Using SCOOPEXL™ is easy, fast and safe.

COMFORT -

The concave shape is perfect for the patient comfort and guarantees more contact points between the body and other immobilisation aid.

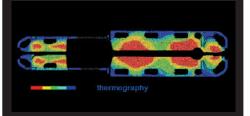

SAFETY 0 -

The patented Twin Safety Lock (TSL) system prevents accidental opening of the SCOOP EXL™

SCOOPEXL™ is easy to sanitise as all its components are easy to reach.

ERGONOMICS 6 -

Designed and manufactured according to the most advanced ergonomics criteria, it guarantees the operator to maintain a correct posture during all rescue and transport manoeuvres of the patient.

THERMAL INSULATION ———

SCOOPEXL™ guarantees immediate and effective thermal insulation thanks to its special plastic material of which it is made.

DIAGNOSTICS —

SCOOPEXL[™] can be used during X-ray imaging examinations necessary for the urgent treatment of traumatized patients.

The absence of ferromagnetic materials allows its use in Magnetic Resonance Imaging.

COMPLIANCE

Compliant with **UNI EN 1865** Locking systems compliant with UNI EN 1789

Not magnetic.

length adjustment up to a maximum of 2010 mm. Easy to close and transport thanks to its reduced weight and minimum overall dimensions. It can be stored in an ambulance with minimum space requirements.

MAIN FEATURES

- ► Made of special aluminium alloy and plastic polymers, HDPE.
- ▶ Patented Twin Safety Lock (TSL)
- ► Ergonomic.
- ► Foldable and divisible into 2 parts.
- Adjustable in length up to 2010 mm.
- ► Compatible with X-ray diagnostic tests
- ► Easy to sanitise.
- ► Compatible with quick-release restraints.
- Available colours: yellow, red, green and grey.

TECHNICAL SPECIFICATIONS

Maximum length	2010 mm / 79.13 in
Minimum length	1647 mm / 64.82 in
Maximum width	432 mm / 17 in
Dimensions when folded	1200x430x80mm / 47x17x3.15
Weight	8 kg / 17.63 lb
Load capacity	227 kg / 500.44 lbs

EMERGENCY KIT

- Bag/backpack
- SCOOPEXL™ stretcher
- Head immobiliser B-lock
- WizLoc neck brace
- Snap-hook restraints 436i
- Disposable thermal blanket
